

Philips
Wireless Hi-Fi Headphone

SHD8900

Rich wireless music

True to the last detail

Clear digital transmission, flawless reception and true CD sound quality deliver acoustics that are incredibly rich yet smooth. Its audio performance is matched by premium comfort from a self-adjusting inner headband and soft ear cushions.

Superior listening experience

- Crystal-clear (2.4 GHz) digital transmission
- True CD sound quality lets you enjoy your music fully
- Dual-antenna design ensures 360° reception
- Acoustically tuned speakers for outstanding sound quality

Provides comfort for prolonged use

- Self-adjusting inner headband ensures a comfortable fit
- Ergonomically-designed ear cushions ensure comfortable fit

Ease of use

- Quick charge feature for speedy recharging
- Store your receiver on the convenient docking station

PHILIPS
sense and simplicity

Specifications

Sound

- Acoustic system: Closed
- Magnet type: Neodymium
- Frequency response: 20 - 20,000 Hz Hz
- Signal/noise ratio: >88 dB
- Speaker diameter: 40 mm

Tuner/reception/transmission

- Automatic channel selection
- Effective range: 30 m

Convenience

- Automatic power off
- Base Station Features: Power LED Indicator
- Battery low indication
- Battery charging indication
- Operating time: +/- 10 hours

Accessories

- AC/DC adapter: 6V/1000 mA DC
- Battery charger: recharging docking station

Power

- Power supply headphone: 3x AAA rechargeable batteries
- Power supply transmitter: 6V/1000 mA DC

Packaging dimensions

- Packaging dimensions (W x H x D): 21.5 x 31.5 x 13.5 cm
- Net weight: 0.89 kg
- Gross weight: 1.23 kg
- Tare weight: 0.34 kg
- EAN: 87 12581 43514 1
- Number of products included: 1
- Packaging type: Box

Outer Box

- Outer carton (L x W x H): 42.5 x 23.2 x 31.2 cm
- Net weight: 2.67 kg
- Gross weight: 4.22 kg
- Tare weight: 1.55 kg
- EAN: 87 12581 43516 5
- Number of consumer packages: 3

Highlights

2.4 GHz digital transmission

The 2.4 GHz digital transmission prevents compression and data loss between the transmitter and the headphones. The digital signals are converted to analogue signals at the end of the transmission process. The end-result is superb sound quality, with smooth acoustics and minimal data loss.

True-to-source acoustics

The true CD sound quality lets you maximise your music enjoyment, as the sound playback is true to the original music source, thanks to a sophisticated digital transmission process that ensures no data compression.

Dual antennas

The dual-antenna design ensures that there are no blind spots, regardless of reception angles. The headphones contain two individual antennas, placed in the left and right ear shells, for superb wireless music without interruption (no blind spots) and greater freedom of movement.

Acoustically tuned speakers

Pure balanced sound is achieved by expert acoustic tuning for the speaker elements. In particular, the high tones and deep bass are reproduced with greater precision.

Self-adjusting inner headband

The inner headband makes it easy to obtain a perfect fit for your head. The mechanism adjusts automatically for comfort.

Smart and quick charging

The smart and quick charge feature enables the battery to be fully recharged within a very short time span. The remaining power capacity present in the battery is determined by an internal circuit, so that the incoming voltage can be optimised for a quick recharge while at the same time maximising the battery lifespan.
